

**BELTS &
HOSES**

Did you know that most automobile makers recommend that you should have all your belts and hoses replaced after 50,000 miles?

Sooner or later your vehicle's engine accessory drive belts and coolant hoses will dry out and crack, and that's not good folks. One sudden malfunction of these relatively inexpensive but very important parts can have costly consequences. In reality, it's not easy to know the true condition of a belt hose by its outward appearance, because most belts and hoses fail from the inside out.

According to a recent survey, nearly one-third of all cars and light trucks have belts or hoses that should probably be replaced. Proper maintenance of your vehicle's belts and hoses is an easy way to protect your car's reliability and prevent more costly repairs down the line.

At Jay's Automotive, we have the technician's, technology, and road trip "readiness" available for you and your car. If you have any questions, concerns or issues, please email at jaysautomotive1959@gmail.com or call us (918) 333-3700!
