

# **What Do All Those Warning Lights on**

## **My Dash Mean?**

There's a warning light illuminated on your dashboard - what does it mean and what should you do? AAUUGGHH! Problem is, a lot of these lights resemble ancient Egyptian hieroglyphics.

These are sometimes called idiot lights because if they are ignored and additional damage occurs, you feel like an idiot. The most effective thing to do to understand all these potential warnings is to get out your owner's manual and familiarize yourself with the section on instrument panel warning lights. And as always, if you're not sure or you have questions, you can always see us at [Jay's Automotive](#)- we'll be happy to help!
